

# Gallery Walk Observations

**Directions:** Lay out the problem you created (with the picture complete and/or the algebra tiles laying out) from activity sheet 4.1 on your desk. Your teacher will instruct you how to walk so that you get to walk around the room and look at all of your classmates' pictures/tiles. When doing this, look for what is the SAME about ALL problems in terms of which tiles are used and where (i.e., where are the  $x$  "squares", where are the  $x$ 's and where are the ones?)

Record your observations (in words or pictures) about what is the same in all the pictures/tiles in the space below. Be prepared to share your findings with a partner or the class.

## Observations about what is the SAME in all the pictures

All the pictures or tiles have \_\_\_\_\_.

## Picture of what I SEE:
